

# Substitutes for milk and dairy products

Would you like to treat yourself to a glass of cow's milk, but because of lactose intolerance, you can't even think of it?

Would you like to treat yourself to your favorite bread for breakfast, but you can't because of celiac disease?

Or are you a vegan and need an efficient solution for your plant-based diet?

Our company GM CHEM might have a **SOLUTION** for you!

Our supplier is coming to the market with a revolutionary plant-based drink powder.

- No irritating allergens.
- No lactose.
- No meat and animal products.

Want to know more? Let's go another slide!

## Organic Coconut Drink Powder

- A unique product with the taste of fresh coconut and exceptional use as an alternative to milk
- Obtained by a patented freeze-drying method from coconut cream (24%)
- Composition: 80% coconut + 20% water
- Without additives: sugar, dyes, milk, aromas
- Easily digestible
- The product does not contain lactose, allergens, gluten and is a certified vegan product
- Use: cosmetics, drinks, meals, vegan products, soups, ice cream, yogurts and creams

**Brief description: This is not a genetically modified plant. The origin of this plant is from Sri Lanka/Thailand.**

# Organic Oat Drink Powder

- One of the traditional and most famous raw materials
- It is obtained through the diffusion process, where oat flour is processed into oats
- Comparison with cow's milk: the carbohydrate content is higher, without lactose
- It also contains calcium and other vitamins, does not contain saturated fat and cholesterol
- Consumed by athletes, weight watchers and bodybuilders
- It can be consumed directly after fortification, easily digestible
- Use: certified vegan products (ice cream growing trend), baking, cosmetics, many variants
- Does not contain allergens

**Brief description: it is hydrolyzed oat whole grain flour, which has a color and smell specific to oats. The country of origin is Germany. There are 2 types of this powdered drink (one without and the other where there may be traces of milk).**

# Organic Almond Drink Powder

- The production consists in exerting careful pressure on the tonsils
- Ingredients: Almonds + rice syrup powder + agave fiber + natural vanilla flavor + carob flour
- Original origin Spain, Italy
- Rich in: phosphorus, magnesium, iron, calcium and mainly proteins
- Similar to oatmeal: it is lactose-free, does not contain saturated fat (minimal), often consumed by athletes and does not contain cholesterol
- Increase in popularity of products made from almonds (products like ice cream), certified vegan product
- Use: cooking, cosmetics, soups, vegan products, yogurts and creams and others
- Contains allergens: almonds

**Brief description: The drink is made from organic almonds. It has a typical creamy white color. Grown in the EU (France).**

# Organic Tapioca Drink Powder

- The powder/flour is produced by the diffusion process from tapioca roots
- True origin from Thailand and Vietnam
- Ingredients: 95% organic tapioca + salt + beta-glucan + sunflower oil
- Similar to oatmeal: it is lactose-free, does not contain saturated fat, is allergen-free, often consumed by athletes and does not contain glucose and artificial sweeteners or flavors
- Suitable for people who have a lower cholesterol tolerance
- Use: cosmetics, drinks, meals, vegan products, soups, ice cream, yogurts and creams
- ✓ Tapioca drink (Powder) should be stored at < 90°F gluten < 20 mg in a cool, dry environment, away from sunlight

**Brief description: originating from Pakistan in powder form. Made from tapioca starch. Color pale white.**

# Organic Rice Drink Powder

- It is produced by the diffusion process
- Brown rice from our fields guarantees a high quality product
- Ingredients: 95% organic rice + salt + betaglucan + sunflower oil
- Compared to milk: it is lactose-free, does not contain saturated fat, is often consumed by athletes and does not contain glucose and artificial sweeteners or flavors
- Does not contain cholesterol
- These products have a growing trend, are easily digestible and vegan certified
- Usage is the same as for previous products

**Brief description: gluten-free rice drink. It is not a genetically modified. Originally from Pakistan. The color is typical for the given type of cereal.**
